

UNIVERSITY OF VERONA

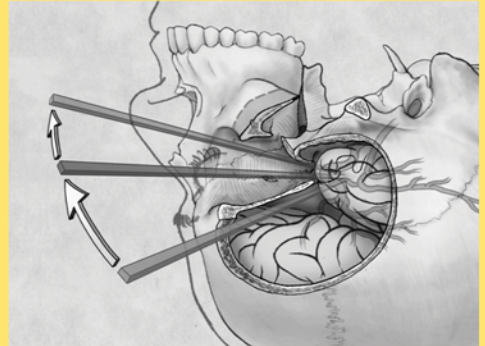

SECOND LEVEL MASTER'S COURSE 2018-2019

HANDS-ON SURGICAL APPROACHES TO THE ANTEROLATERAL SKULL BASE

The course provides comprehensive theoretical and practical instruction on surgical access to the anterolateral skull base, an anatomically homogenous region.

This one-of-its-kind course features:

- Continuity of learning throughout the year
- Multimodal teaching: hands-on, live surgery, workshops, lessons, etc.
- One cadaver head per participant
- Three 3-day dissection courses on each of the following:
 - transcranial, pterional and variants
 - endonasal and median subfrontal
 - other approaches, including those directed to the orbit
- Multidisciplinary faculty
- Range of techniques from microscopic to endoscopic
- Guided comparison of surgical approaches to the same intracranial area

Venue: Verona at University Hospital and at ICLO Teaching and Research Center
Period: 1/12/2018 - 1/12/2019
Price: 4.000,00 Euros
Target audience: Neurosurgeon, Maxillofacial Surgeon and Otorhinolaryngologist

Course director: Andrea Talacchi M.D. - andrea.talacchi@univr.it

Applications for admission to the course will open in July 2018
and will be posted on www.univr.it
